SUMMARY

Education professional transitioning into technology and project management, with hands-on experience designing learning products, coordinating projects, and translating user needs into structured solutions. Currently building skills in data analytics, AI, and technology through graduate coursework and independent product development. Experienced in working across users, stakeholders, and project requirements to design, iterate, and deliver user-centered experiences.

EXPERIENCE

HELIOS SCHOOL — Kindergarten Associate Aug 2025 – Present | Bay Area, CA

- Collaborate with teachers to plan and execute interdisciplinary learning projects, aligning learning objectives, timelines, resources, and student needs.
- Coordinate multiple projects simultaneously, from initial planning and material development through implementation, observation, and iteration.
- Identify user needs through observation and feedback, then adapt project plans and learning experiences based on findings.
- Create structured project documentation, instructional materials, and resources to support consistent implementation.
- Communicate with teachers and families to share progress, identify needs, and coordinate follow-up actions.

SELF-INITIATED AT-HOME LEARNING PROJECT — Learning Specialist Nov 2023 – Present | Bay Area, CA

- Independently plan and manage end-to-end delivery of Montessori-inspired educational projects, translating children's learning needs and parent feedback into structured project requirements.
- Define project goals, scope, and deliverables, then coordinate curriculum design, visual development, prototyping, and iteration from concept to launch.
- Conduct informal user research through conversations with parents and observation of children's engagement, using feedback to identify opportunities and refine project requirements.
- Build and manage project timelines across multiple concurrent deliverables, including curriculum content, activity design, visual assets, and digital product materials.
- Design and create learning resources using Canva, Adobe Photoshop, and Wix, balancing educational objectives, usability, and visual communication.
- Independently manage stakeholder communication, feedback collection, and project execution while adapting priorities based on user needs.

PROJECTS

SOULIE — AI Emotional Learning Companion Project Management | 2026–Present

- Independently owned project scope for an AI-powered emotional learning companion, from problem definition through requirements, prioritization, and delivery planning.
- Defined target users, user needs, project goals, core features, and user flows using a child-centered design approach.
- Wrote a product requirements document translating emotional-intelligence concepts into interaction flows and a feature-prioritized MVP scope.
- Sequenced and prioritized MVP features against delivery timeline and available resources, including opportunities for AI-assisted interactions.
- Managed iteration cycles independently, incorporating usability feedback into revised requirements and project plans.

SOCIAL RESTAURANT RECOMMENDATION SYSTEM Team Project | Team of 5

- Co-planned a structured 8-week team roadmap across proposal, progress, and final-delivery milestones, individually owning problem definition, dataset justification, and final report integration to keep the team on schedule.
- Contributed to requirements definition, user flows, and feature design, coordinating with four teammates to keep technical work aligned to project goals.
- Translated user needs into product functionality and worked cross-functionally with teammates to refine and integrate the final solution.
- Presented project outcomes through a team poster, communicating the approach and value to a broader audience.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY Expected 2028

M.S. in Analytics

Relevant Coursework: Computing, Data Analytics, Artificial Intelligence

TEACHERS COLLEGE, COLUMBIA UNIVERSITY 2022

M.A. in Early Childhood Education

WHITMAN COLLEGE 2020

B.A. in Sociology & Rhetoric Studies

SKILLS

Project & Product: Project Planning, Requirements Gathering, User Research, Product Design, UX, Prototyping, Documentation, Stakeholder Communication, Cross-functional Collaboration, Problem Solving

Technology & Data: Python, SQL, Tableau, Data Analysis, AI/LLM Tools, Google Workspace

Design & Tools: Canva, Adobe Photoshop, Wix, Figma
